REAL-TIME CLEARING

CnS offers real-time post-trade, tailor-made and client focussed solution that align with the need and strategies of exchanges/clearing organization with unprecedented speed and proficiency. Through its robust technology, CnS empowers members and partners to consistently grow and innovate in their markets.

VALUE PROPOSITION

- **HIGH AVAILABILITY**

CnS provides exhaustive clearing solutions ensuring uninterrupted trade enrichment and settlement thereby harnessing the potential of growth in international markets. Multi-user environment for processing the transactions even during exigencies on account of software and hardware outages.

- **FLEXIBILITY**

CnS provides highly flexible and configurable solution enabling customized settlement schedule for products ranging from spot, derivatives, negotiated trades and OTC markets. Delivery mechanism allows hybrid mechanism of physical/electronic delivery schedule with ability to predate the schedule of delivery as per need of market. Seamless integration with banks, depository and warehouses/vaults enables launching of innovative products.

- **INNOVATIVE & COST-EFFECTIVE SOLUTIONS**

CnS is a market leader in providing one of the most comprehensive suites of innovative, high quality and cost-effective clearing and settlement solutions in order to leverage the latency sensitive capital markets. Incorporating best practices, CNS offers multi-faceted growth as cornerstone through its enriched technical and functional features.

- **TOP PERFORMANCE**

Specialized and exuberant processing increases the transparency and speed of market operations through improved performance. It augments clearing of huge number of trades with ultra-low latency and guaranteed disaster recovery. The highly scalable design of the product ensures that growth in volumes can be easily accommodated.

- **PLUG IN RISK-MANAGEMENT**

The system can be integrated with standalone and vendor neutral real-time risk-management system to manage the risk across multiple asset classes. RISKx, Advanced Risk-Management solution from 63 moons, providing quantification of risk-based on thumb rules, Value at Risk and CME SPAN™ can also be plugged in for risk management.
